EDUCATION

Swami Keshvanand Institute of Technology, Management & Gramothan

Jaipur, Rajasthan

Pursuing - Bachelor of Technology in Computer Science

2024 - 2028

Modi Public School Kota

Kota, Rajasthan

Class 12 (PCM) - 70%

2023 - 2024

Modern School Kota

Kota, Rajasthan

Class 10 - 83%

EXPERIENCE

MLOps Engineering Intern

Summer 2026

Binomial Technologies Pvt. Ltd.

Jaipur, Rajasthan

- Built production MLOps pipelines for training, tracking, and deploying computer vision models
- Orchestrated end-to-end ML workflows using Apache Airflow DAGs with automated retraining triggers
- Integrated MLflow for experiment tracking, model versioning, and artifact management across environments
- Containerised inference services with Docker for reproducible, scalable model serving
- Applied learnings post-internship to build VisionOps-an open-source, adapter-based MLOps platform

Web Development Intern (In-House)

Summer 2025

KISTECHNO Software

Jaipur, Rajasthan

- Built responsive front-end interfaces using HTML, CSS, JavaScript, and PHP with modular components
- Integrated dynamic backend logic and implemented real-time form validation
- Collaborated with peers to simulate client requirements and delivered functional prototypes aligned with industry standards
- Applied learnings post-internship to build Bookvnts - a full event booking platform, live at [Bookvnts](#)

PROJECTS

VisionOps | *Python, Airflow, MLflow, YOLO, HuggingFace, Docker*

Jul 2026

- Architected a self-service, adapter-based platform for training, tracking, and running inference on object-detection models
- Designed a pluggable BaseDetector interface allowing new architectures (YOLO, Hugging Face, custom) to integrate without modifying the core pipeline
- Implemented orchestration with Airflow and MLflow, containerising all services with Docker for scalable deployment

Bhumika Floral Creations - IMS | *React, Node.js, SQL*

2026

- Developed a full-stack inventory management system for a floral decor startup to track stock of real and artificial plants
- Designed a React dashboard enabling non-technical staff to seamlessly manage daily orders, vendors, and inventory categories

TerraVision (Prototype) | *Python, Computer Vision, GIS*

Sep 2026

- Exploring terrain analysis and satellite imagery processing using deep learning models
- Combining remote sensing data with computer vision for environmental monitoring and land classification

Bookvnts | *PHP, MySQL, HTML, CSS, JavaScript*

Jul 2025

- Designed and deployed a full-stack, responsive event booking platform
- Implemented a complete booking flow, encrypted credential storage, and secure user sessions

TECHNICAL SKILLS

Languages: Python, C++, JavaScript / TypeScript, Java, PHP, HTML/CSS, SQL

Frameworks / Libraries: React, Node.js, YOLO, HuggingFace Transformers, Bootstrap-5, TailwindCSS, shadCN UI

ML / AI: Computer Vision, Deep Learning, MLOps, Experiment Tracking, Model Serving

Infrastructure & Tools: Docker, Apache Airflow, MLflow, Git, Linux, VS Code, Jenkins

Data & BI Tools: Power BI, Tableau, MySQL, PostgreSQL

CERTIFICATIONS & HACKATHONS

HackIndia Spark-12

PIET

Participant - 36-Hour National Hackathon

- Competed in a 36-hour hackathon building a working prototype under intense time constraints

NPTEL Certifications

IITs/IISc

Programming in C, Programming in Java

Oracle Certification

Oracle Academy

Database Management System (DBMS)
